### MESSAGE

I am indeed delighted to offer this online service to agri entrepreneurs. The Farm Implements & Machinery Testing and Training Centre of Swami Keshwanand Rajasthan Agricultural University, Bikaner the nodal agency approved by the Govt. of India for testing and certifying the Agricultural Implements is already providing yeoman service to the manufacturers who can get their prototype(s) tested and certified so that they can sell to farmers under subsidy schemes. The efforts of this centre are duly recognized across the region through ISO 9001:2015 certification in the year 2016.

Connecting with digital era and marking a further development in digital agriculture, the centre is offering online services through this portal. The manufacturer can register and deposit the testing fee online, avoiding time delays so that the farmers, the end beneficiaries, can also get benefitted through this platform.

I heartily congratulate Er. Vipin Laddha and his team for this venture and wish them all success.

R.P. Singh
